

mouse

**POLISH MANUFACTURER
OF SPECIAL NEEDS STROLLERS**

The MOUSE special purpose stroller is designed for the smallest children who are unable to walk or sit in the correct position as a result of injury or another condition. This stroller is suitable for children at a height of 80 - 110 cm and a weight of 30 kg.

Thanks to adjustable pads for head and torso you can optimize MOUSE's backrest, what gives a better protection and stabilization in the stroller. Moreover, the adjustment of the seat (CRADLE function) and backrest allow you to customize the optimal position of the stroller to the child's needs.

Large gel-filled wheels with shock absorbers for all wheels together with the pedal for lifting facilitate travel on uneven ground. Modern design is an additional advantage of the stroller.

INDICATIONS:

paralysis and paresis of lower limbs, of various origin
paralysis and paresis of torso
weakening of postural muscles responsible for maintaining proper body position, most commonly caused by such conditions as:
cerebral palsy, myelomeningocele.

4 positions

BACKREST ADJUSTMENT

wide range of adjustment

16°- 88°

4 positions

FOOTREST ADJUSTMENT

simple and quick adjustment

84°- 173°

6 positions

SEAT MINIMIZING KIT

reducing inserts

The MOUSE stroller SEAT MINIMIZING KIT consists of a narrowing and shallowing insert, which significantly reduces the internal parameters of the stroller. Thanks to this solution, you can use the stroller for years.

INDIVIDUAL STABILIZATION

adjustable pads set

Two pairs of pads (head and torso) with a wide range of adjustment provides an additional stabilization of the child in the stroller. Thanks to independent adjustment of the height and width of each pad arrangement as well as the angle of their inclination, we can make the stroller a comfortable and safe mean of transportation for the child.

LYING POSITION

adjustments combination

Thanks to a wide range of adjustment of the backrest's, seat's and footrest's angle, you can easily set the stroller in a lying position, allowing for a short rest or even a nap.

REVERSIBLE SEAT

arrange your travel easily

You can easily and quickly change the direction of mounting the seat in the frame. Thanks to this function you can keep an eye on your child during travel.

COMPACT FRAME

easy folding and transportation

The construction of the trolley allows for quick and easy folding for transport or storage.

DRIVING SUPPORT

comprehensive running system

The stroller has many driving aids, such as the forward directional lock on the front wheels, central brake, shock absorbers for all wheels and a pedal for lifting.
